BIOCHEMICAL ENGINEERING V[a]

Editors and Conference Chairmen
MICHAEL L. SHULER and WILLIAM A. WEIGAND

CONTENTS

Preface. *By* WILLIAM A. WEIGAND and MICHAEL L. SHULER xi

Part I. Basic Advances in Cellular Sciences

Redirection of Cellular Metabolism: Analysis and Synthesis. *By* JAMES E. BAILEY, DOUGLAS D. AXE, PAULINE M. DORAN, JORGE L. GALAZZO, KENNETH F. REARDON, ALEX SERESSIOTIS, and JACQUELINE V. SHANKS ... 1

Transport of Substrates and Metabolites and Their Effect on Cell Metabolism (in Butyric-Acid and Methylotrophic Fermentations). *By* E. T. PAPOUTSAKIS, C. M. BUSSINEAU, I-M. CHU, A. R. DIWAN, and M. HUESEMANN 24

Growth of Extremely Thermophilic Archaebacteria under Elevated Hyperbaric Conditions. *By* F. J. STURM, A. K. PARAMESWARAN, C. N. PROVAN, and R. M. KELLY 51

Construction of a Vector Plasmid That Can Be Maintained Stably at Higher Temperatures in *Bacillus stearothermophilus* and Its Application. *By* SHUICHI AIBA, MING ZHANG, and JUN-ICHI KOIZUMI 67

Manipulation of End-Product Distribution in Strict Anaerobes. *By* GOVIND RAO, P. J. WARD, and R. MUTHARASAN 76

Part II. Basic Advances in Physical and Chemical Sciences

The Behavior of Immobilized Living Cells: Characterization Using Isotopic Tracers. *By* STEVEN F. KAREL, CATHERINE A. BRIASCO, and CHANNING R. ROBERTSON 84

Determining Pathway Structure-Property Relationships through Experimentation and Analytical Frameworks. *By* M. M. DOMACH and R. A. MAJEWSKI 106

Spectroscopic Studies of Structure-Function Relationships in Free and Immobilized Alcohol Dehydrogenase. *By* D. S. CLARK, P. S. SKERKER, E. J. FERNANDEZ, and R. B. JAGODA 117

[a]The papers in this volume were presented at the Fifth Biochemical Engineering Conference, held at New England College, Henniker, New Hampshire, on July 26 to August 1, 1987. The conference was organized by the Engineering Foundation with the support of the National Science Foundation and the New York Academy of Sciences.

Part III. Bioreactors I (Tissue Cultures)

Large-Scale Culture of Hybridoma and Mammalian Cells in Fluidized Bed Bioreactors. *By* ROBERT C. DEAN, JR., SABHASH B. KARKARE, NITYA G. RAY, PETER W. RUNSTADLER, JR., and K. VENKATASUBRAMANIAN 129

Analysis of Mammalian Cell Growth Factor Receptor Dynamics. *By* DOUGLAS A. LAUFFENBURGER, JENNIFER LINDERMAN, and LYLE BERKOWITZ 147

Bioreactor Operating Strategies for Plant Cell Cultures. *By* H. PEDERSEN, G. H. CHO, R. HAMILTON, and C-K. CHIN 163

Fluid Dynamic Considerations in Airlift and Annular Vortex Bioreactors for Plant Cell Culture. *By* N. H. THOMAS and D. A. JANES 171

Characterization of Plant Somatic Embryo Development Using Fourier Shape Analysis. *By* D. CAZZULINO, H. PEDERSEN, C-K. CHIN, K. VENKAT, and C. STYER 190

Part IV. Bioreactors II (Immobilized Biocatalysts)

Analysis of Bioreactors Containing Immobilized Recombinant Cells. *By* KEVIN BAILEY, WOLF R. VIETH, and GOPAL K. CHOTANI 196

Maximizing Productivity in an Immobilized Cell Reactor. *By* J. L. VEGA, E. C. CLAUSEN, and J. L. GADDY 208

A Novel Bioreactor System for Biopolymer Production. *By* DAVID K. ROBINSON and DANIEL I. C. WANG 229

Economics of Immobilized Biocatalyst Processes. *By* WALTER E. GOLDSTEIN 242

Protease Production by Immobilized *Bacillus licheniformis*. *By* W. B. OKITA and D. J. KIRWAN 256

Part V. Bioreactors III (Systems with Spatial Heterogeneity)

Role of Motility, Chemotaxis, and Adhesion in Microbial Ecology. *By* MICHAEL J. KENNEDY 260

Microbial Colonization of Solid-Liquid Interfaces. *By* DOUGLAS E. CALDWELL . 274

Bacterial Chemotaxis: Cell Flux Model, Parameter Measurement, Population Dynamics, and Genetic Manipulation. *By* DOUGLAS A. LAUFFENBURGER, MERCEDES RIVERO, FRANCIS KELLY, ROSEANNE FORD, and JOSEPH DIRIENZO 281

Preliminary Studies Assessing Sodium Pyrophosphate Effects on Microbially Mediated Oil Recovery. *By* YOU-IM CHANG 296

Modeling and Simulation of Photosynthetic Microbial Growth. *By* L. E. ERICKSON, C. E. CURLESS, and H. Y. LEE 308

Continuous Enzymatically Catalyzed Production of L-Leucine from the Corresponding Racemic Hydroxy Acid. *By* B. BOSSOW and C. WANDREY .. 325

Solubilization of Bacterial Cells in Organic Solvents via Reverse Micelles and Microemulsions. *By* G. HAERING, A. PESSINA, F. MEUSSDOERFFER, S. HOCHKOEPPLER, and P. L. LUISI 337

Membrane Transport and Biocatalytic Reaction in an Immobilized Yeast Membrane Reactor. *By* M. VASUDEVAN, T. MATSUURA, G. K. CHOTANI, and W. R. VIETH 345

Part VI. Mixed Cultures and Genetically Unstable Populations

Feeding, Growth, and Reproduction of Ciliate Microorganisms: An Engineering View. *By* F. SRIENC, A. G. FREDRICKSON, and D. P. LAVIN 357

Some Factors Affecting the Copy Number of Specific Plasmids in *Bacillus* Species. *By* TADAYUKI IMANAKA 371

Growth Behavior and Prediction of Copy Number and Retention of ColE1-Type Plasmids in *E. coli* under Slow Growth Conditions. *By* B. G. KIM, T. A. GOOD, M. M. ATAAI, and M. L. SHULER 384

Genetically Structured Kinetic Model for Gene Product and Application of Gene Switching System to Fermentation Process Control. *By* DEWEY D. Y. RYU and SUNGHOON PARK..... 396

Part VII. Biosensors and Reactor State Estimation

Sensitivity and Dynamics of Bioreceptor-based Biosensors. *By* JEROME S. SCHULTZ 406

Intelligent Sensors in Biotechnology: Applications for the Monitoring of Fermentations and Cellular Metabolism. *By* JOSEPH J. VALLINO and GREGORY N. STEPHANOPOULOS..... 415

On-Line Measurement of Culture Fluorescence for Process Monitoring and Control of Biotechnological Processes. *By* TH. SCHEPER, TH. LORENZ, W. SCHMIDT, and K. SCHÜGERL 431

Control of Bacterial Fermentations. *By* RAKESH BAJPAI 446

Bioreactor Operating Strategies for Microbial Lipids from Carbohydrates. *By* TARUN K. GHOSE, GOPAL K. CHOTANI, P. GHOSH, and V. SAHAI..... 459

Part VIII. Integration of Reaction and Recovery

Integration of Bioconversions and Downstream Processing—Some Model Studies. *By* OLLE HOLST, RAJNI KAUL, MATS LARSSON, and BO MATTIASSON 468

Process Development of a Prototype Extractive Fermentation System. *By* FINN KOLLERUP and ANDREW J. DAUGULIS 478

Polysaccharides as Adsorbents: An Update on Fundamental Properties and Commercial Prospects. *By* JAY Y. LEE and MICHAEL R. LADISCH 492

Enzyme Reaction in a Membrane Cell Coupled with Electrophoresis. *By* C. K. LEE and JUAN HONG 499

Changes in the Protein Profile of *Streptomyces griseus* during a Cycloheximide Fermentation. *By* KEVIN H. DYKSTRA and HENRY Y. WANG 511

Bioreactor System with Solvent Extraction for Organic Acid Production. *By* VIJAY M. YABANNAVAR and DANIEL I. C. WANG 523

Membrane-Assisted Extractive Butanol Fermentation. *By* Y. J. LEON and Y. Y. LEE..... 536

Enzymatic Synthesis of L-Ascorbic Acid via D-Uronic Acids; Membrane-Reactor Integrated Recovery of D-Galacturonic Acid from Pectin Hydrolysates. *By* KLAUS D. KULBE, ASTRID HEINZLER, and GISELA KNOPKI..... 543

Enzyme-Catalyzed Production of Mannitol and Gluconic Acid: Product Recovery by Various Procedures. *By* KLAUS D. KULBE, URSULA SCHWAB, and WILHELM GUDERNATSCH 552

Part IX. Aspects of Transport Processes

Enhanced Oxygen Transfer Using Oil-in-Water Dispersions. *By* JAMES D. MCMILLAN and DANIEL I. C. WANG 569

Transport Phenomena in Gas-Sparged Bioreactors: The Significance of the Elasticity of the Microbial Suspension. *By* TIMOTHY OOLMAN, ECKEHARD WALITZA, and HORST CHMIEL 583

The Influence of "Slip" on Rheological Measurements on a Mycelial Broth of *Aspergillus niger*. *By* D. GRANT ALLEN and CAMPBELL W. ROBINSON 589

Scaleup Strategies for Bioreactors Containing Non-Newtonian Broths. *By* DAVIS W. HUBBARD 600

Thermalizer: High-Temperature Short-Time Sterilization of Heat-Sensitive Biological Materials. *By* STANLEY E. CHARM and STEVEN H. LANDAU 608

Part X. Enzyme Production

The Influence of PEG on α-Amylase Production with *Bacillus* Species. *By* ELIS ANDERSSON, MIA RAMGREN, and BÄRBEL HAHN-HÄGERDAL 613

Structured Modeling Approach to α-Amylase Fermentation Using Fed-Batch Cultures of *Bacillus* Species. *By* J. PONZO, F. KELLER, S. J. PARULEKAR, and W. A. WEIGAND 617

Improvement of β-Amylase Production by New β-Amylase Producers and New Culture Conditions. *By* R. SHINKE, Y. NUMATA, T. NANMORI, and K. AOKI 626

Continuous Production of *Bacillus* Exoenzymes through Redox-Regulation. *By* K. MEMMERT and C. WANDREY 631

Production of Enzyme Systems in Continuous Culture for the Controlled Lysis of Microbial Cells. *By* B. A. ANDREWS and J. A. ASENJO 637

Part XI. Other Aspects of Bioreactions

Investigation of the Action Mechanism of a Cellodextrin Glucohydrolase Using Soluble Cellodextrins as Substrates. *By* G. SCHMID and C. WANDREY 642

A Distributed Model of Enzymatic Lysis of Microbial Cells. *By* J. B. HUNTER and J. A. ASENJO 649

The Fungal Production of Cyclosporine. *By* S. N. AGATHOS, C. MADHOSINGH, J. W. MARSHALL, and J. LEE 657

Effect of Culturing Conditions on the Production of Exotoxin A by *Pseudomonas aeruginosa*. *By* ILSE I. BLUMENTALS, ANNE K. SKAJA, ROBERT M. KELLY, THOMAS R. CLEM, and JOSEPH SHILOACH 663

Minimizing Enzyme Requirement by Choice of Appropriate Reactor Type: Computer Simulation and Experimental Results. *By* M. HOWALDT, K. D. KULBE, and H. CHMIEL 669

Chicken Manure Methanogenesis: Toxicity of Dietary Feed Ionophores to Methane Formation from Acetate. *By* CARLOS DOSORETZ and RAPHAEL LAMED 676

Jute Fiber as a Filter Medium in Microbial Air Filters. *By* S. K. MANDAL and B. N. SRIMANI 682

Index of Contributors 689
